

K62900D

RE4R01A

We now have available seals for the units with Inner and Outer D-rings on the Low/Reverse Clutch piston. These units, while less popular than those with a Lip seal on the outer, have been showing up from time to time. Many customers have asked about these seals over the last few years as Nissan/Mazda does not service, or even acknowledge, the existence of these versions. The only prior solution was to change the piston. This will now allow the builder to save the expense and search for another piston.

We are adding 1 piece each to the following:

62108 D-ring, Low/Reverse Inner

62408 D-ring, Low/Reverse Outer

****Please contact your PI Sales Rep or Distributor for more information****
