The Problem Solvers

VW 4 SPEED AG4, RENAULT AD4/AR4/AD8

We are pleased to announce that our kits now contain all* (SPX) Sealed Power brand rings. These rings exhibit increased tension capabilities over the OEM and other aftermarket rings and provide a better seal against the ring bore. This prevents cross-leaks and allows for crisper clutch apply.

Note: It is recommended that all Bushings be checked for excessive wear and replaced accordingly as well.

*Only early 1989-94 (1988-98 Renault) Input Shaft/K3 clutch ring is not available from SPX.
