# Product Update

**AXOD, AXODE, AX4S, AX4N**

In 2002 OE has changed the design of the  
Axle Seal.

The seals' benefits are an upgrade to Viton<sup>®</sup>  
material and a rubber sealing bead on the outer  
diameter. The trailing (dust) lip has a dual wiper in  
order to better keep external dust and dirt out.

This seal will retro-fit back to 1986.

Precision International part number 59117

OEM part number 2F1Z - 1177 - AB
